SKILL

Mobile App Development

- Performance Optimization
- Debugging & Bug Fixing
- Theme Customization
- State Management:
 - GetX, Riverpod, BLoC
- Firebase Integration
- REST API Integration
- Local Database
 - SQLite, Get Storage
- Third-party Libraries:
 - dio, flutter_screenutil, qr_flutter, google_maps_flutter, flutter_secure_storage, encrypt & more

Version Control

- Git
- GitHub

Languages

- Dart
- Java
- Kotlin (basic)
- Python (basic)

AI & Emerging Technologies:

- Basic understanding of AI concepts and terminology
- Familiar with Agentic AI workflows and AI-assisted development
- Experience using AI tools to improve productivity

OBJECTIVE

Flutter Developer with 1.5+ years of experience specializing in debugging and optimizing complex codebases. Skilled at solving challenging problems through deep analysis and delivering stable, high-performance applications under pressure. Continuously learning advanced Flutter concepts, tools, and best practices, while expanding knowledge in Artificial Intelligence and Agentic AI to build smarter and more efficient software solutions.

WORK EXPERIENCE

May 2025 - Present

Sparktech Agency

- Worked on 13+ existing Flutter applications across different domains, focusing on bug fixing, feature enhancements, and performance optimization.
- Analyzed and maintained large production codebases, resolving complex issues and improving app stability and performance.
- Delivered features and fixes under tight deadlines while handling multiple projects simultaneously.
- Integrated REST APIs, Firebase services, maps, authentication, chat, and third-party SDKs.
- Successfully published and maintained production apps on both Google Play Store and Apple App Store.
- Developed and maintained one Flutter application from scratch (Tradiezz), handling architecture, UI, state management, API integration, testing, and deployment.

Projects

Tradiezz — Job Circular & Recruitment App

[APK](#)

- Designed and developed from scratch using Flutter.
- Job circular and recruitment platform for employers and job seekers.
- Implemented feature-first architecture, state management, REST APIs, and Firebase.
- Actively improving features, performance, and scalability while managing the full development lifecycle.

Servana — Service Booking App

[Play Store](#)

- Service booking app connecting customers with verified contractors.
- Worked on an existing production app focusing on bug fixes, feature enhancements, and performance optimization.
- Improved booking flows, contractor discovery, and ensured stable Play Store releases.

SwiftSwap — Product Swapping Platform

[Play Store](#)

- Product swapping platform with secure and rewarding user experience.
- Contributed to an existing codebase by fixing bugs, optimizing performance, and adding features.
- Worked on ad posting, search, real-time chat, rewards, and rating/review systems for Play Store release.

Other Projects:

- PodLove, Grupo ANF, Impacto App, Night Out Finder, Careness, Kids Know Rights, Theory Panda, U-Tree Hub, Dental Desh App, Bazar 24/7

EDUCATION

B.Sc. Pass Course

Govt. Bangabandhu College
2015 - 2018
CGPA: 2.77

HSC

Sabira Rouf College
2013 - 2015
GPA: 3.58

SSC

Angaria High School
2012
GPA: 4.13

PERSONAL

- Name: Rafiqul Islam Shaon
- Date of Birth : 19 Oct 1996
- Gender : Male
- Marital Status : Single
- Nationality : Bangladeshi
- Religion : Islam
- Permanent Address : Bongram, Gopalganj Sadar, Gopalganj
- Current Address : Mohakhali

Biddabari Publications

Oct 2024 - May 2025

- Developed and maintained a large-scale job preparation application for BCS, Bank, and other government job aspirants.
- Converted Figma designs into responsive and user-friendly Flutter interfaces.
- Integrated RESTful APIs for authentication, content delivery, and data operations.
- Implemented scalable state management using GetX.
- Optimized performance to reduce load times and improve overall app responsiveness.
- Collaborated closely with designers, backend teams, and stakeholders to ensure timely delivery.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications.
- Successfully published and maintained the app on Google Play Store.

Projects

Biddabari

[Play Store](#)

- Flutter-based educational platform for government job preparation (BCS, Bank, SI, and more).
- Features free and premium courses, PDF notes, practice exams, job circulars, blogs, and book purchasing.
- Implemented offline video downloads and supported both light and dark themes.
- Contributed to feature development, performance optimization, and production releases.

Biddabari (WebView Version)

[Play Store](#)

- Developed a WebView-based Flutter application using flutter_inappwebview during a critical company phase.
- Served as the primary learning platform for approximately 80% of active users.
- Improved user experience by removing unnecessary headers and footers.
- Implemented a custom bottom navigation bar for smoother in-app navigation.
- Dynamically handled URLs to trigger specific in-app actions based on user requests.
