SKILLS

Mobile App Development

- Performance Optimization
- Debugging & Bug Fixing
- Theme Customization
- State Management:
 - GetX, Riverpod, BLoC
- Firebase Integration
- REST API Integration
- Real-time Communication (Sockets)
- Maps & Location Services
- Audio/Video Calling
- IAP Integration

Version Control

- Git
- GitHub

Languages

- Dart
- Java
- Kotlin (basic)
- Python (basic)

AI & Emerging Technologies:

- Basic understanding of AI concepts and terminology
- Familiar with Agentic AI workflows and AI-assisted development
- Experience using AI tools to improve productivity

EDUCATION

B.Sc. Pass Course
Govt. Bangabandhu College
2015 - 2018

OBJECTIVE

Flutter Developer with 2+ years of experience building and maintaining scalable mobile applications. Contributed to 15+ client applications, including a government job preparation platform with 100K+ downloads. Skilled in code review, debugging, performance optimization, API integration, and delivering production-ready applications for both the Google Play Store and Apple App Store.

WORK EXPERIENCE

Biddabari Publications

Flutter Developer (Part-time) | Jun 2024 – Present

Built and maintained a large-scale government job preparation platform with 100K+ downloads, actively used by thousands of students preparing for BCS, Bank, SI, and other government job exams. Developed core features including course streaming, exams, offline video downloads, job circulars, blogs, push notifications, and RESTful API integration while improving app performance and maintaining production releases.

Projects

Biddabari

[Play Store](#)

A Flutter-based learning platform for BCS, Bank, SI, and other government job preparation. The app provides free and premium courses, exams, PDF notes, job circulars, blogs, and offline video access for students.

Sparktech Agency

Flutter Developer (Full-time) | May 2025 – Present

Contributed to 15+ client applications by implementing features including maps, sockets, push notifications, audio/video calling, deep linking, encryption, and in-app purchases, while performing code reviews, debugging, performance optimization, RESTful API integration, and feature development. Took ownership of unfinished projects, transformed them into production-ready applications, and maintained successful releases on both the Google Play Store and Apple App Store.

Projects

Grupo ANF

[Play Store](#)

A corporate food ordering app with separate company and employee roles. Companies can manage employee accounts and track orders, while employees can browse menus and order meals directly from the app.

Servana

[Play Store](#) | [App Store](#)

Worked on a live service booking app by fixing bugs, improving performance, and adding new features including sockets, maps, and push notifications to improve the overall user experience.

Other Projects

[Rey Barber](#), [Transport](#), [Curlu](#), [PodLove](#), [Tradiezz](#), [Impacto App](#), [Night Out Finder](#), [Careness](#), [Kids Know Rights](#), [Theory Panda](#), [U-Tee Hub](#), [Dental Desh App](#), [Bazar 24/7](#)
